

Adrian Sweeney Plumbing & Heating Contractor Environmental Policy

It is the aim of the environmental policy of Adrian Sweeney Plumbing & Heating Contractor to achieve required standards set out in the Waste Management Act, 1996 and the Regulations made under the Act, and the Environmental Protection Agency Act, 1992 and Regulations made under the Act.

Our company is committed to the prevention of pollution and continual improvement of environmental standards.

Reducing waste and the consumption of resources such as materials, fuels and energy are two ways our intend to improve their environmental impact, we also are committed to recovering and recycling as much waste as is possible by using the best available treatment, recovery and recycling of waste products.

Adrian Sweeney Plumbing & Heating Contractor will minimise the production of pollutants to the environment, this will include purchasing materials and products which will be less harmful to the environment when used and disposed.

It is the company policy is to use the best available techniques not entailing excessive cost and will adopt technologies and raw materials that will minimise pollution, energy use and waste.

Adrian Sweeney Plumbing & Heating Contractor will also expect suppliers and other contractors that they deal with to have high environmental standards and any sub-contractors or self employed person working on the company's behalf will be made aware of the policy on the environment and of their environmental responsibilities and will issue warning to those who do not comply with this policy.

The Management of Adrian Sweeney Plumbing & Heating Contractor understand that public opinion demands that environmental damage is kept to a minimum and it is therefore in their interest to communicate our environmental objectives, efforts and achievement to the public.
